

NATIONAL SENIOR COMMUNITIES

About Us:

National Senior Communities, Inc., is the not-for-profit, supporting organization to the largest system of not-for-profit continuing care retirement communities (CCRCs) in the United States.

In this role, the Board of Directors of National Senior Communities and its staff, through its mission, provide ongoing strategic planning and policy development to maintain the highest standards of quality, care, and financial oversight, and to ensure compliance and charitable purpose, within the entire portfolio of individual communities.

More than **25,000 residents live** and **14,000 employees work** within the system of 21 CCRCs supported by National Senior Communities.

Today, the system represents more than **one billion dollars of investment** in high-quality, affordable seniors housing across 11 states, with 18 communities currently open and operating, and 5 under development.

In addition to being the largest not-for-profit system, the system **leads the industry in occupancy, with an overall average of 92%**, ahead of the industry average by 4% when comparing to entrance fee CCRCs, and 6% when comparing to all CCRCs.

National Senior Communities believes in diversity, equity, inclusion, and belonging in all of our supported communities.
